

Versatile Shelving

Whether in a warehouse, temporary field office, or other facility setting, our heavy-duty DuraShelf units meet a multitude of storage needs.

Bulk Storage

Need to store large and heavy items? We have the solution. Our heavy-duty all-plastic HDPE material has made DuraShelf the bulk storage method to stand the test of time.

Horizontal Storage

Our shelving goes beyond traditional storage methods. Clear cluttered walkways by storing long items like PVC pipe horizontally across the entire panel to avoid floor storage and leaning objects against walls.

Chemical Storage

Keep chemical storage simple by adding Containment Trays to your DuraShelf unit. These trays provide organization and keep solvents separated and classified with OSHA certified color coding.
