

Military Decon

A

POLY-RISER™

Temporary flooring is pertinent in decontamination areas. Our raised flooring system will cover large surface areas with minimum effort for set-up.

B

POLY-RISER™ RAMPS

Transporting large or heavy equipment onto a raised flooring system is more accessible when ramps are incorporated.

C

ADD-A-LEVEL™

The flow-through pattern of our flooring unit makes an excellent solution for decontamination tents or wet areas. This flooring keeps individuals up and out of harmful substances as they pass through to the surface underneath.

D

DUNNAGE-RACK

Use as a drying rack or simply to aid in lifting equipment up and out of the way of contaminated ground surfaces.
